We cater to every segment of the healthcare community

SEGMENTS WE SERVE

PROVIDERS

Our innovative services and solutions help your organization deliver coordinated, quality care and improve financial performance.

PAYERS

How will your organization transform to deliver greater value? We help implement process improvements, increase innovation and prepare for the future.

MEDICAL DEVICES & PHARMACY

Our services include regulatory compliance solutions, clinical management programs, business intelligence systems and integration services.

HEALTH INFORMATION EXCHANGE

Create a connected Health and Health Information exchange while maintaining HIPAA compliance. THOUGHTI™ HIE solution platform enables you to implement HIE solution on cloud/off cloud with a plug n play product suite.

MEDTECH

Why build your own team when you have a strategic and cost effective partner who understands Software Product Engineering with strong healthcare domain expertise? We accelerate your time to market while lowering costs.

Digital Health Solutions for Payers, Providers and Patients.

Integrated EHR

Increase productivity by 10x with our integrated EHR service for your health systems.

Vendor Neutral Archive

Store information and allow real-time retrieval while maintaining compliance with privacy and security regulations, ultimately assuring independence from vendor-specific data formats.

Telehealth

Virtually interact with your patients from any device while retaining data from the encounter directly inside the electronic medical record.

Image Exchange

Accelerate patient outcome by exchanging medical images in real-time. Grow your referrals and patient transfers worldwide. No VPN or CDs.

Remote Patient Monitoring

Intelligent solutions to monitor, manage and engage patients at scale with minimal manual effort while increasing revenue.

Referral Management

A seamless end-to-end bidirectional solution that integrates directly with payers, specialists and patients.

Chronic Care Management

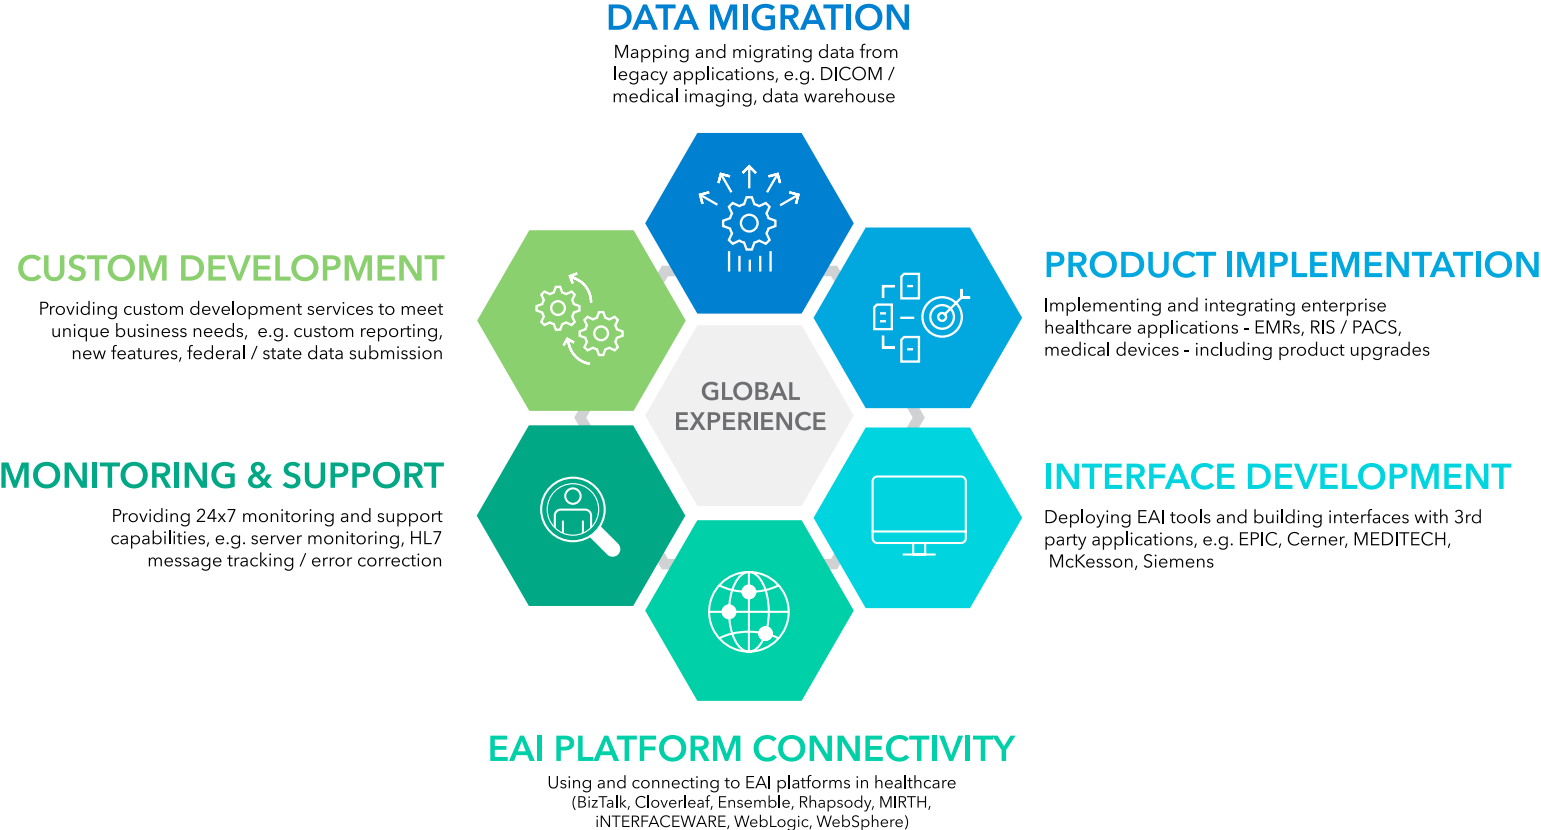

AI-Driven chronic care management navigates patients around health risks while using the data to predict future ones.

COVID-19 Screening Tool

Screening tool helps providers scale their availability by reducing the onslaught of worried patients converging on a facility, focusing physicians attention on who needs it most.

THOUGHTi Professional Services Practice

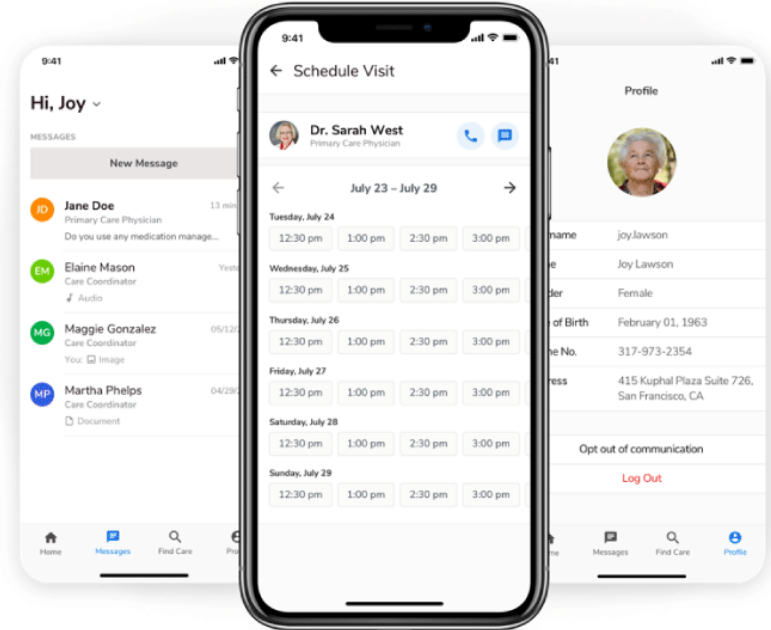

Each of these practices and applications needs a trusted and regulated, cloud-connected infrastructure.

COVID-19 Screening Tool

The buys vs. build dilemma

To launch and maintain digital health solutions, you need an underlying regulated infrastructure. However building a custom platform introduces a number of challenges

Speed and scale

Developing a custom, siloed platform can take 2+ years, even without integration into the broader digital health ecosystem

Cost

Standing up a novel solution is expensive upfront — maintaining its adaptability, scalability, and security can be exorbitant.

Compliance

Creating a robust Quality Management System is resource-intensive, with added complexity from evolving global regulatory, privacy, and security regulations.

Strategy

Building an in-house digital infrastructure is a competitive disadvantage for healthcare organizations, given the complexity, resourcing, and market evolution. To drive speed to market, you should focus your team on specific digital health IP that is core to your business and partner on the underlying infrastructure to drive speed to market.

THOUGHTi takes the hard work out of building, scaling, and maintaining your digital health offerings.

Partner with us for the digital transformation journey of your healthcare enterprise.

Connectivity

Connectivity and management for regulated apps, algorithms, devices or combination products.

Data management

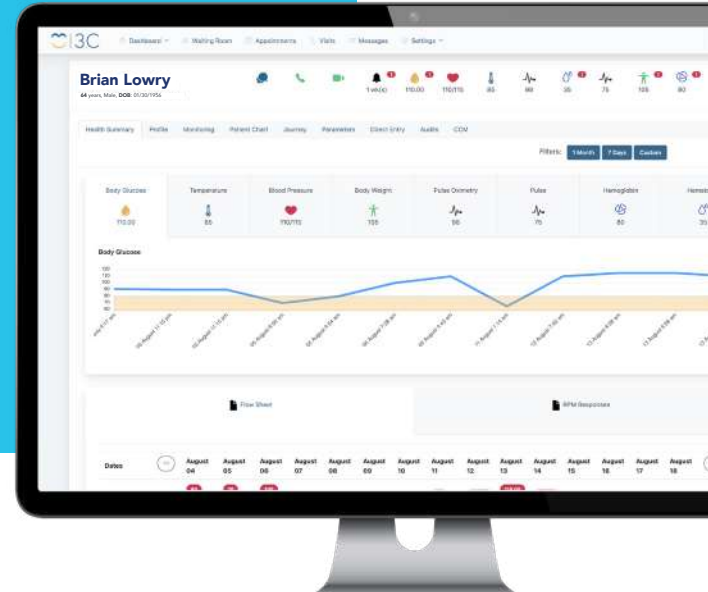

Data aggregation from multiple sources and can integrate with EHRs and other IT systems.

Analytics and insights

Clinical, operations and patient engagement dashboards provide valuable insights in real-time.

People are increasingly expecting healthcare on their own terms, and they expect digital to be the enabler. From using data to understand meal preferences of a patient in hospital, and delivering those meals exactly when they want them, to delivering information through the right channel based on selected preferences—digital can support delivery of healthcare when, where and how people want it.

Our Integration Partners

Our Digital Health companies under the leadership of THOUGHTi group.

A trusted partner you can count on.

Based in St.Louis with teams all over the globe, THOUGHTi is backed by leading healthcare and technology VCs. Our leadership team brings over 100 years of combined digital health experience in the healthcare technology and integration industry.

Our vision is to create a thriving ecosystem that delivers accessible, high-quality, and sustainable healthcare for all. A vision to make care accessible to those most in need by building technology that scales.

The world's leading healthcare companies trust THOUGHTi as their regulated digital health platform, supporting transformational digital health solutions including Software as a Medical Device, connected combination products, apps, algorithms, and more.

"We selected THOUGHTi because its pre-built, compliant platform accelerates our time to market while allowing us to focus on digital health innovation and leveraging our clinical know-how to improve patient outcomes instead of the underlying infrastructure. "

LIZ WARD
FORMER VICE PRESIDENT, REVENUE CYCLE
INOVA

"After conducting a rigorous evaluation, we selected THOUGHTi because it has the only regulated interoperable solution with a robust Quality Management System and a comprehensive list of privacy and security certifications. THOUGHTi's Platform allows us to focus on therapeutic innovation, rather than the underlying digital technology."

TODD CRAGHEAD
VICE PRESIDENT, REVENUE CYCLE
INTERMOUNTAIN HEALTHCARE

Medical-grade digital health platforms like 3C from THOUGHTi are key to helping us improve the conversation between people with diabetes and their caregivers."

JEFF TAYLOR
SENIOR VICE PRESIDENT, CHIEF FINANCIAL OFFICER
ST. LUKE'S HEALTH SYSTEM

"If you leverage a solution like THOUGHTi that meets the most stringent requirements and maintains compliance as part of their managed service, you don't have to worry about your regulated digital solutions in the U.S. versus Europe versus U.K. and so on. You just know they're compliant."

MIKE WEED
SENIOR VICE PRESIDENT OF FINANCIAL OPERATIONS
INTEGRIS HEALTH
